ABHIGYAN SINHA

WEB DEVELOPER

PROFESSIONAL SUMMARY

As a dedicated web developer, I possess a comprehensive proficiency in JavaScript, React, and Node.js, specializing in the creation of scalable web applications. My expertise is rooted in leveraging React for sophisticated front-end development, utilizing Node.js for robust back-end functionalities, and employing Express.js for efficient server-side routing and middleware integration. I am committed to continuous learning and excited to contribute fresh perspectives to a collaborative development team.

PROJECTS

SOCIAL MEDIA WEBSITE

- Developed a Pinterest clone project featuring high-quality image sharing, personal profile creation, and CRUD functionality.
- Utilized Express.js, Node.js, EJS, and MongoDB to build a scalable and efficient backend for the application.
- Integrated CRUD operations to enable users to create, read, update, and delete pins and profiles seamlessly.
- Focused on delivering a high-quality user experience while maintaining code quality and performance standards.

React Projects

1. React Hooks-Powered **Password Generator**
2. A Website Frontend using **React-router-dom**.
3. A Simple **Shopping Cart** using React's Context API!
4. A Simple **TODO** List App using Redux Toolkit!
5. **User Authentication System** using the MERN Stack
