PROJECTS

1. E-auction

- Actively contributed to the development and optimization of an e-auction website.
- Utilized skills in web design to enhance user experience.
- Played a pivotal role in creating a seamless and engaging online auction environment.
- Improved overall functionality of the website.

2. Furore

- Designed the platform to empower startups by serving as a hub for sharing business models, success stories, and opportunities.
- Created a space where startups could connect with a wider audience.
- Facilitated inspiration for aspiring entrepreneurs.
- Implemented features to facilitate seamless interaction between startups and interested individuals.

3. Block chain and cybersecurity

- Utilizes distributed ledger technology (DLT) for transparency, security, and trustworthiness.
- Allows users to make their documents digital assets.
- Stores documents on the blockchain, ensuring they are not controlled by a centralized party.
- Offers decentralized finance (De-Fi) solutions, enabling individuals to manage their finances without the control of a single authority.
- Provides users with full control over their money.
