FRONTEND DEVELOPER

To contribute to the success of an organization by fully utilizing my skills and knowledge in the field of Software industry in a position offering continuous growth and development.

TRAINING & CERTIFICATION

Full Stack Development Course
upGrad campus (MERN Developer)
Oct *2022 to Sep2023*

- *Proficient in* **HTML, CSS, JavaScript**, *and other web development technologies.*
- *Efficient with* **React.js, Node.Js, mongoDB and Express.js**
- Experience with front-end frameworks such as React .
- Understanding of version control systems like Git.

ScriBBler

https://github.com/Nileshu001/ScriBBler.git

Major Technologies:
React.js, HTML, CSS, Bootstrap, JavaScript

Description:
ScriBBler is a static blog project developed during the Full Stack Development Course. It is a platform where users can read and share blog posts on various topics

Responsibilities:

- Collaborated with a team of developers to plan and implement the ScriBBler project.
- Designed and developed the user interface using HTML, CSS, and JavaScript, ensuring a responsive and intuitive design.

Twitter Clone   on progress

Front-end Code   Back-end Code

Major Technologies:
React.js, HTML, CSS, Bootstrap, JavaScript, Node.Js, mongoDB and Express.js

Description:
Our Twitter Clone is like a copy of Twitter. It lets people from all over the world talk to each other by sending short messages called "tweets." It's easy to use, just like Twitter.

Responsibilities:

- **User Authentication and Authorization:** Implementing secure user authentication mechanisms to ensure that only authorized users can access the platform's features.
- **Posting Tweets:** Help users write, edit, and delete their tweets. Make sure tweets aren't too long and let users share and like them.
- **User Profiles:** Let users customize their profiles, see their tweets and followers, and manage their settings.

Achievements:

- Successfully developed a fully functional static blog platform that provides an interactive and user-friendly experience
